

Sumeet K Shukla

Database Administrator, Cloud Architect
& Site Reliability Engineer

Professional Summary

- ✓ With over 12 years of diverse expertise encompassing database administration, site reliability engineering, and cloud solutions architecture, I specialize in orchestrating high-volume database ecosystems. My focus lies in ensuring peak performance, security, scalability, reliability, high-availability, disaster-recovery, and observability.
- ✓ Building and upgrading Infrastructure (IaC) on AWS using Terraform & Packer.
- ✓ Automating various DB operations and Configuring DB CI/CD pipelines using FlywayDB, CircleCI, GitHub, Kubernetes, Helm Charts.
- ✓ Helping the DevOps team to reduce Time to Release by automating and configuring pieces in CI/CD pipelines using CircleCI, AWS ECR, Docker, GitHub etc.
- ✓ Performing homogeneous and heterogeneous database migrations both on-prem and on cloud.
- ✓ Performance Benchmarking and Server tuning for maximum resource utilization to squeeze best performance out of it.
- ✓ Interacting with developers, reviewing the performance reports and helping the teams in optimizing the slow performing queries.
- ✓ Installing & Upgrading database servers, determining backup strategies & security procedures and setting up HA & DR sites.
- ✓ Configuring replication, connection pooling and load balancing through different mechanisms and tools for enhanced performance and availability.
- ✓ Researching and configuring various tools for monitoring, alerting, generating performance reports and troubleshooting applications.
- ✓ Defining, Documenting and Maintaining DB and DevOps processes and best practices.
- ✓ Defining OKR's, Planning roadmaps and leveraging agile methodologies along with various open source tools for improved outcomes.
- ✓ Defining Incident Management and On-Call Processes and Managing a team of DBA's and SRE engineers.
- ✓ Defining and configuring Policy as a Code to automate PR approvals.
- ✓ Designed and Developed web based applications using PHP, jQuery, CSS, HTML, Wordpress, Magento.
- ✓ Provided BI solution support to Enterprises using Oracle and Business Objects product suites.
- ✓ Enhancement and Support for reports in BOXI, Crystal Reports, SSRS.
- ✓ Demonstrated an unwavering resolve to do whatever must be done to produce the best long-term results and have been consistently able to exceed the set expectations.
- ✓ Love to take ownership of a problem and see it through the resolution while quickly adapting and implementing new technologies.
- ✓ Recognized for the automation initiatives and innovative approach towards the issues and Received Extra Miles award for exceeding the expectations in previous organizations.

+91-740 612 1115

Skills Set

Database Administration: PostgreSQL, AWS RDS/Aurora, MongoDB, MySQL, Redshift, Security, Migration, Performance Tuning

DevOps & Cloud: AWS Cloud, Kubernetes, Kustomize, Helm Charts, IaC (Terraform, Packer), CircleCI, GitHub, GitHub Workflows/Actions, CentOS, Ubuntu, Amazon Linux

Scripting: SQL, Shell Scripting, YAML, Python, jQuery, JSON, PHP

MELT Tools: Nagios, New Relic, SolarWinds, Splunk, Honeycomb, DataDog

Tools: pgAdmin, flywayDB, pgBench, pgPool, pgAudit, foreign data wrappers, pgBadger, pgRepack, PEM, TOAD, PuTTY, VS Code, StatusPage, dBeaver, BOXI, Crystal Reports

Agile: Scrum, Kanban, Jira, Confluence

Education

- ✓ Master of Computer Applications
Pune University, Pune
2010-2013
- ✓ Bachelor of Computer Applications
Annamalai University, Chennai
2008-2010
- ✓ Diploma in Electrical-Electronics Engg.
Central Polytechnic College, Chennai
2004-2007
- ✓ Matriculation (CBSE Board)
Govt. Hr. Sec. School, Dirang
2004

Experience Summary

- ✓ Technical Specialist (Senior Database Reliability Engineer) – Hexaware Technologies - India – Feb 2024 to Present
- ✓ Senior Site Reliability Engineer - Talabat (Delivery Hero), Dubai (UAE) - Mar 2019 to Feb 2022
- ✓ Database Administrator - Optum (UHG), Chennai - Apr 2017 to Mar 2019
- ✓ Network Specialist - Aricent Technologies for Cisco, Bangalore - Aug 2016 to Apr 2017
- ✓ Founder Director - ThoughtBirds Technologies LLP - Nov 2013 to Jul 2016
- ✓ Associate Engineer - Xento Systems, Pune - Oct 2012 to Oct 2013
- ✓ Assistant Systems Engineer - Tata Consultancy Services, Chennai - Jul 2007 to Feb 2010

Certifications

-  AWS Certified Database Speciality in 2024
-  New Relic Full Stack Observability Practitioner in 2024
-  University of London - A Practical Guide to Managing People at Work in 2023
-  HashiCorp Certified: Terraform Associate in 2023
-  Certified Kubernetes Administrator (CKA) in 2021
-  Certified Kubernetes Application Developer (CKAD) in 2021
-  Oracle Certified Foundations Associate - Cloud Infrastructure in 2022
-  EDB Certified Professional - PostgreSQL 12 in 2020
-  EDB Certified Associate - PostgreSQL 12 in 2020
-  AWS Certified Solutions Architect - Associate in 2019
-  Scrum Fundamentals Certified in 2014
-  Oracle Certified Associate in Jul 2011
-  IBM Big Data Administration 2015
-  IBM Big Data Programming in 2015

Achievements

- ✓ Received Extra Miles award for exceeding the expectations in the current and previous organizations.
- ✓ Recognized for saving millions of dollars in infrastructure costs by optimizing the servers, automating the processes and performance tuning databases.
- ✓ Recognized for the automation initiatives and innovative approach towards the issues.
- ✓ Successfully ran an IT services startup for more than 2 years.
- ✓ Brought positive changes in the existing FMR Process in project.
- ✓ Presented a paper on High Voltage Direct Current (HVDC) at State Level.
- ✓ Secured 15th Position in NTSE State Level Examination.
- ✓ Secured 5th Position in JEE for Diploma in State.
- ✓ Won prizes in Science Seminars, Quiz Competitions & Chess Tournaments.

Professional Projects Summary

Project # 8	Carlyle Project Transition	Feb 2024 - Till Date
Company/Client	Hexaware / Carlyle	
Role	Technical Specialist (Cloud Architect & DB Consultant)	
Responsibilities	✓ Supporting transition of complete DataOps platform of Carlyle from incumbents to Hexaware. ✓ Leading and Managing the DataOps team to support smooth transition and conclude the KT sessions and shadowing on time. ✓ Conducted an internal training and workshops on PostgreSQL DB Administration company wide. ✓ Will be working on Installing & Upgrading database servers, determining backup strategies & security procedures and setting up HA & DR sites. ✓ Managing snowflake and snaplogic infrastructure on cloud using Terraform and Azure DevOps. ✓ Deploying schema migrations using FlywayDB.	
Environment	AWS Cloud Services, Terraform, PostgreSQL, RDS/Aurora, GitHub, UNIX, SQL, Shell Scripting, Atlassian Jira & Confluence, Snowflake, FlywayDB	

Project # 7	Site Reliability Engineering	Mar 2019 - Feb 2022
Company/Client	Talabat - Delivery Hero	
Role	Senior Database Administrator	
Responsibilities	✓ Documenting and educating developers about the SQL and database best practices and standards. ✓ Conducted KT sessions and workshops on: ○ how to choose a DB engine based on the business requirement and type of data. ○ impact of appropriate column ordering, referential integrity, indexing etc. ○ importance of proper data modelling and schema design to enable developers to create well structured schemas. ○ Incident and on call management process. ✓ Ensuring that the site and infrastructure is reliable by implementing HA and DR solutions. ✓ Managing a fleet of AWS RDS and Aurora instances, configuring them for maximum performance and securing them with the help of VPC, subnets, NACL and security groups. ✓ Configuring and Analyzing RDS performance insights and tuning the performance of slow running queries and resolving any other issues. ✓ Migrating RDS instances to Aurora DB and implementing maintenance and monitoring around it.	

	✓ Migrated databases from on Premise SQL Server to PostgreSQL on cloud and achieved 200% performance improvement. ✓ Implemented and configured DB CI/CD for quicker and error free deployments using FlywayDB. ✓ Configuring Alerts and monitoring using AWS CloudWatch, SNS, NewRelic and OpsGenie. ✓ Defined Incident Management Process and implemented tools like OpsGenie, PagerDuty, NewRelic etc. ✓ Performing RCA of the incidents and documenting it. ✓ Using Terraform and Packer to deploy resources on AWS cloud. ✓ Helping the DevOps team to reduce Time to Release by automating and configuring pieces in CI/CD pipelines using CircleCI, AWS ECR, Docker, GitHub etc. ✓ Using Kubernetes, Helm Charts and Shell Scripts to configure tools like pgBadger, pgRepack and automate other day to day DB maintenance tasks. ✓ Promoted agile development methodologies and configured Confluence and Jira to support the team with sprint planning and other agile ceremonies. ✓ Actively participated in regular DR exercise and ensure that the whole infra is up and running in less than 2 hours.
Environment	AWS Cloud Services, Terraform, Packer, Docker Containers, Kubernetes, PostgreSQL, SQL Server, GitHub, UNIX, SQL, Shell Scripting, Splunk, New Relic, Nagios, pgBadger, pgRepack, pgAdmin4, dBeaver, Trello, Atlassian Jira & Confluence, OpsGenie, PagerDuty, CircleCI

Project # 6	Application and Database Operations	Apr2017 - Mar 2019
Company/Client	Optum Analytics (United Health Group)	
Role	Database Administrator	
Responsibilities	✓ Leading a team of highly skilled PostgreSQL & MySQL DBA's. ✓ Performed Architectural Health Checkup of company's infrastructure upon joining and improvised performance of existing PostgreSQL servers by up to 150% by tuning the OS and DB configurations. ✓ Performed Installation, Upgradation, Configuration, Replication and Maintenance of PostgreSQL and MySQL servers. ✓ Planned and Implemented data backup, recovery, and security procedures. ✓ Capacity Planning, High Availability & Disaster Recovery site setup. ✓ Travelled to United States to understand the requirement and implement HA solution for one of the critical products. ✓ Prepared shell scripts for task automation. ✓ Server performance tuning and query tuning. ✓ Performing regular health checks on database servers. ✓ Implemented various tools like Nagios, pgBadger, pgAdmin, pgPool-II, PEM, OPM just to name a few. ✓ Worked on MongoDB, SQL Server, and Oracle at the time of need. ✓ Conduct training for new joiners. ✓ Performing RCA of the issues and documenting it. ✓ Created SSRS report to provide the daily status of the backups on all our DB engines including Oracle, MySQL, PostgreSQL and of course SQL Server.	
Environment	PostgreSQL 9.x & 10, MySQL 5.6/5.7/8.0, MongoDB 3.x, MS SQL Server 2016, Oracle 12, UNIX, SQL, Shell Scripting, Splunk, New Relic, vRealize, Graphite, Nagios, pgBadger, pgAdmin4, AWS Cloud, Atlassian Confluence, Microsoft SSRS	

Project # 5	EMaaS - Energy Management as a Service on Cisco Cloud	Aug 2016 - Apr 2017
Company/Client	Aricent Technologies at Cisco Systems	
Role	PostgreSQL DBA	
Responsibilities	✓ Installation, Configuration, Replication and Maintenance of PostgreSQL servers. ✓ Planned and Implemented data backup, recovery, and security procedures. ✓ Performed installation and testing of upgrades and patches. ✓ Capacity Planning, High Availability & Disaster Recovery site setup. ✓ Prepared shell scripts for task automation. ✓ Server performance tuning and query tuning. ✓ Performing regular health checks on database servers. ✓ Implemented various tools like Nagios, pgBadger, pgAdmin, pgPool-II, PEM, OPM just to name a few. ✓ Worked on Docker containers. ✓ Conduct training for new joiners. ✓ Performing RCA of the issues and documenting it. ✓ Participated actively in 5 days' workshop on MongoDB.	
Environment	PostgreSQL 9.x, MySQL 5.6, UNIX, SQL, Shell Scripting, Docker, Nagios, pgBadger, pgAdmin4, AWS Cloud, Quicksilver, Confluence, Citrix Receiver	

Project # 4	IT Services Startup	Nov 2013 - July 2016
Company/Client	ThoughtBirds Technologies LLP	
Role	Co-Founder Director	
Responsibilities	✓ Managed everything from client acquisition to requirement analysis to design and development of web-based applications at various scales. ✓ Installation, configuration, and maintenance of PostgreSQL & MySQL servers. ✓ Planned and implemented data backup, recovery, and security procedures. ✓ Prepared shell scripts for task automation. ✓ Coordinated with technical teams for installation and testing of upgrades and patches. ✓ Capacity Planning, High Availability & Disaster Recovery site setup. ✓ Learned and worked with new technologies like AWS, Hadoop, HDFS, MapReduce, Hive, Pig, HBase, Sqoop, Flume, and Zookeeper. ✓ Performance tuning of WordPress and Magento based websites. ✓ Design & Develop web-based applications using PHP, jQuery, CSS, HTML, WordPress, Magento. ✓ Implemented scrum agile methodology using open-source tools to manage project. ✓ Learnt various aspects of people management. ✓ Recruited, trained, and managed a team of 6.	
Environment	PostgreSQL 9.x, pgAdmin, pgBadger, Nagios, AWS Cloud, OPM, Oracle 11g, UNIX, SQL, Shell Scripting, TOAD 9.6, PHP, HTML, CSS, jQuery, WordPress, Magento, Firebug, Redmine, JIRA	

Project # 3	Operations	Oct 2012 - Oct 2013
Customer	Xento Systems – subsidiary of Property Solutions	
Role	Database Administrator	
Responsibilities	✓ Checking the errors on live databases and resolving them while working closely with developers. ✓ Managing and monitoring the PostgreSQL servers on development & stage environments. ✓ Creating, updating & maintaining databases. ✓ Backup & Restoration of Databases. ✓ Monitoring Load on servers and max connection using Nagios. ✓ Optimization & Performance Tuning of SQL queries. ✓ Active participation in weekly release process & releasing the SQLs on Live. ✓ Installation, Upgradation & Replication of the PostgreSQL databases. ✓ Wrote shell scripts to automate various database processes. ✓ Handling user access privileges. ✓ Designing & Developing PHP based Web Applications ✓ Performing RCA of Exceptions/SR's/WR's in production environment and fixing them within defined SLA.	
Environment	Shell Scripting, PostgreSQL 9.x, pgAdmin, Nagios, pgBadger, Oracle 11g, Zend Studio 9/10, Tortoise SVN, PHP5, UNIX	

Project # 2	Financial Management Reporting (FMR)	Nov 2008 - Feb 2010
Customer	The Hartford Life Insurance	
Description	The Hartford is a leading provider of investment products such as Annuities, Mutual funds, College savings plans, Life insurance, Group and employee benefits, Automobile & homeowners' insurance and business insurance. TCS is engaged in providing Development, Maintenance, and Support services for Financial Management division of Hartford Life Insurance.	
Role	Report Designer / Production and Technical Support	
Responsibilities	✓ Developing reports using Business Objects DeskI, WebI XIR2. ✓ Creating reports using Crystal Reports XIR2. ✓ Delivering Reports on Financial Application Reserve System (FARS), Repetitive Payment System (RPS) which involves Jobs/Programs written in Mainframes and FoxPro. ✓ Ensuring that the jobs are run successfully and FTP the files to the appropriate location for the end user to access. ✓ Completing the Daily PFADAV Process. ✓ Delivering Weekly Premium Reports & Monthly Marketing Allowance Processes to the business users. ✓ Compiling and validating the Marketing Allowance Totals and FTP it to users. ✓ Documented the complete process of FARS and RPS Reporting Systems. ✓ <i>Have improvised the FARS and RPS Monthly Reporting Process causing the Process to complete in 50% of time.</i> ✓ Providing KT of The Hartford business process and Financial Management Reporting module to new joiners.	
Environment	BOXIR2 Enterprise, Crystal Reports XI, TOAD 9.1, BMC Remedy Tool 7, MS Access 2003	

Project # 1	Information Delivery	Nov 2007 - Oct 2008
Customer	The Hartford Life Insurance	
Description	The Information Management Division of Hartford Life provides support for Individual Annuities, Group Annuities, Mutual Funds, and IRIS (Institutional Retirement & Income solution) Line of Businesses. TCS is engaged in providing Development, Maintenance, and Support services for the Information Management division.	
Role	Mailbox Administration / Production Support	
Responsibilities	✓ Interacting with end users to understand the issue they are facing in various applications like Business Objects, Crystal Reports, Infolink, Oracle Reports, SQL Queries. ✓ Handling the tickets/SRs for Production issues and solving them within defined SLA ✓ Daily Batch Monitoring on reports ✓ Sending the daily updates. ✓ Involved in Break fixing the reports. ✓ Enhancing & testing Crystal Reports. ✓ Giving the Resolution for user's service requests ✓ Tracking all the tickets and Service Requests using the BMC Remedy tool. ✓ <i>Created a reusable tool using MS Access to track SR's & WR's prior to BMC Remedy Tool.</i> ✓ Providing KT of The Hartford business process and IDS Info Delivery module to new joiners.	
Environment	Oracle 9i, BMC Remedy 7, Crystal Reports XI, BO XI R1/R2, TOAD 9.1, MS Access 2003, Windows XP
